

Special Smiles Helps Local Athletes

At the Young Health Athletes pediatric screening hosted on May 7, 2022, we had a child, Kayden Guidry that was seen who was severely autistic. He didn't smile and only interacted with the adoptive parent. Kayden's mom said that Kayden had never interacted with his primary doctor like he did with Dr. Agaja, the Dr. that saw him at our pediatric discipline and the volunteers at the event. Kayden was smiling and interacting even though it was his nap time. His mom explained that she felt that no one had ever taken the time to provide Kayden with a good thorough check-up because of his disability. She was so greatly for this opportunity to be seen and thoroughly checked out. It was a great experience for all involved.
